

A2 Stool

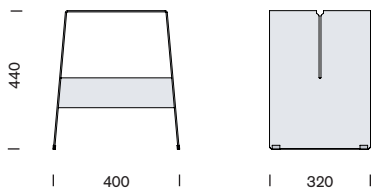

MADE HERE.

IMO

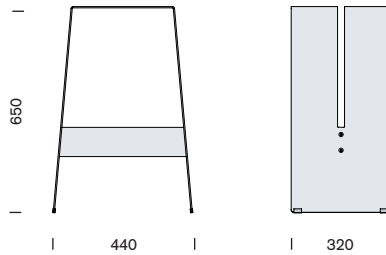

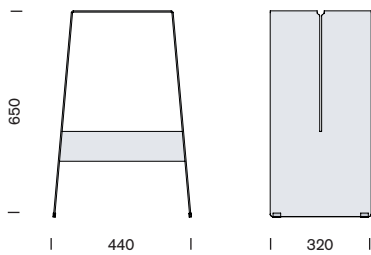

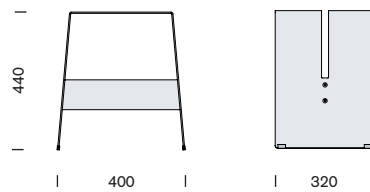

This playful stool is easy to manoeuvre, stackable and cost effective. With the general informality of outdoor dining the A2 stool adds an element of spontaneity, allowing groups to be as intimate or as separate as they want to be. Constructed from aluminium with an outdoor specific powder coat finish. The cross rail is available in matching powder coated aluminium or solid Tawa. The slot in the seat surface makes it easy to carry and drains water from the surface. The aluminium stools can be stacked up to ten high. Available in a wide range of colours.
