

# Kase Home

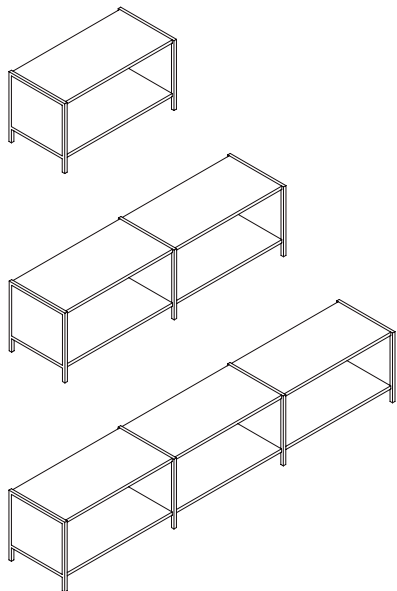

Kase Home is a versatile and practical storage solution for your AV equipment and accessories. The various mobile or free standing units and add on accessories allow for a multitude of combinations to suit your budget and entertainment needs. Shelves are height adjustable to accommodate varying sizes of books and objects. Rear cable port hole keeps wires tidy. Units are available with adjustable feet and trolley with locking castors. Constructed from powder coated steel, Kase Home is designed to hold large flat screen TVs up to 45 kg in weight.

Designed: 2008

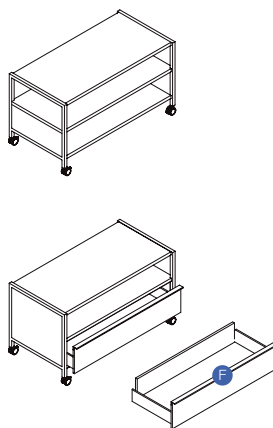

### Creating Your Unit

1. Start with an 800 or 1000mm long module and add on as many modules as required to create desired length. Different length modules can be combined.
2. Add on any accessories such as Drawers or Cupboards to suit your requirements
3. Choose your finish
